

Taskforce Kiwi

Key

Stj Lvl - 1 (Level one first aid course inclusive of 6401 and 6402)

DFA (One day inhouse Disaster First Aid)

DFA - A (Disaster First Aid Advanced)

TASKFORCE KIWI ALL VOLUNTEER FIRST AID MINIMUM COMPETENCIES		Course		
Competency	Description	StJ Lvl 1	DFA	DFA-A
PRIMARY CARE				
Cardiovascular				
General	Be able to recognise classical ischaemic heart pain, TIAs and CVAs, provide immediate treatment and make rational decisions on need, and mode of evacuation.	Stj Lvl - 1		
Angina	Recognise and treat angina and be able to make rational decisions on the need for, and mode of, evacuation.			DFA-A
Acute coronary syndromes	Recognise myocardial infarction and make rational decisions on the need for, and mode of, evacuation.	Stj Lvl - 1		
TIA and CVA	Be able to confidently diagnose and make rapid assessment (FAST), and make rational decisions on the need for, and mode of, evacuation.	Stj Lvl - 1 (FAST),		DFA-A TIAs elaborated on
Respiratory				
General	Have a good overview of asthma, understand basic treatments and be able to assist in improvising delivery devices; appreciate simple assessments of respiratory rate and shortness of breath and make rational decisions on the need for, and mode of evacuation.	Stj Lvl - 1		DFA-A (Elaborated on)
Endocrinology				

TASKFORCE KIWI ALL VOLUNTEER FIRST AID MINIMUM COMPETENCIES		Course		
Competency	Description	StJ Lvl 1	DFA	DFA-A
General	Have a basic understanding of diabetes, be aware of symptoms and signs of hypoglycaemia and hyperglycaemia and be able to provide emergency treatment and appropriate evacuation arrangements for both.	Stj Lvl - 1		
Gastrointestinal				
General	Be conversant with simple measures for management of diarrhoea and vomiting; have a working knowledge of what constitutes an 'acute abdomen' and an understanding of the importance of prompt evacuation		DFA (if part of elective)	DFA-A
Renal and urology				
UTIs	Be able to instigate an appropriate management plan.		DFA (if part of elective)	DFA-A
Musculoskeletal				
Assessment of musculoskeletal pain	Be able to recognise common causes of musculoskeletal pain and appreciate their impact on function.		DFA	
Fractures and dislocations	Have a good understanding of management of fractures/ dislocations, including the ability to make cogent decisions on the need, and mode of, evacuation. Be able to apply standard splintage and have a good working knowledge of the principles of improvised splintage.		Fractures and Splinting DFA	Dislocations DFA-A
Soft tissue injuries	Have an understanding of soft tissue injuries New RICE		DFA	
Neurology				

TASKFORCE KIWI ALL VOLUNTEER FIRST AID MINIMUM COMPETENCIES		Course		
Competency	Description	StJ Lvl 1	DFA	DFA-A
Seizures	Have a good understanding of primary care management of fits.		DFA	
Dermatology				
Wounds	Be able to manage wounds, irrigate and dress appropriately. Recognise early and late signs of infections and knowing how to access antibiotic therapy .Having insights as when to evacuate patient to higher level of care.		DFA (irrigation & dressing)	DFA-A (ABs w/ telehealth)
Blisters	Be able to manage blisters	Own skill		
Burns	Be able to recognise severity of burn and manage appropriately.		DFA	
Infectious disease				
Meningitis	Be conversant with emergency management of meningitis and need for evacuation.			DFA-A
Immunology				
Allergy and anaphylaxis	Be able to manage both simple allergic reactions and anaphylaxis.	StJLvl1 (Epipen)		DFA-A (Elaborated)
ENT				
General	Be able to confidently manage epistaxis (nose bleed)	Own skill		DFA-A
Ophthalmology				
Eye trauma	Be able to irrigate an eye, remove superficial foreign bodies and treat minor trauma appropriately.		??	DFA-A
Mental Health	NOT IN SCOPE To be part of Psychological First Aid course			
TRAUMA				

TASKFORCE KIWI ALL VOLUNTEER FIRST AID MINIMUM COMPETENCIES		Course		
Competency	Description	StJ Lvl 1	DFA	DFA-A
Safety and Scene Management				
	Have the ability to take on the leadership role at an incident and have a good understanding of the capabilities of other staff/helpers			DFA-A
	Have a good understanding of scene safety	Stj Lvl 1		
	Be able to practice dynamic risk assessment of the scene	Stj Lvl 1		
	Be able to perform dynamic risk assessment of casualties taking into account casualty safety	Stj Lvl 1		
Catastrophic Bleed				
	Recognise life-threatening haemorrhage	Stj Lvl 1	DFA	
	Effectively manage catastrophic limb bleed	Stj Lvl 1	TQs on DFA	
	Effectively manage catastrophic junctional bleed			DFA-A
	Able to apply direct pressure	Stj Lvl 1		
	Competent application of tourniquet		DFA	
	Competent in use of haemostatic / wound packing			DFA-A
Spinal				
	Appreciate mode of injury for high risk spinal injury	Stj Lvl 1		
	Appropriate C-spine management including up to date knowledge on RTC extraction			DFA-A
	Put head in neutral alignment	Stj Lvl 1		DFA-A
Airway				
	Inspect and clear airway	Stj Lvl 1		

TASKFORCE KIWI ALL VOLUNTEER FIRST AID MINIMUM COMPETENCIES		Course		
Competency	Description	StJ Lvl 1	DFA	DFA-A
	Head tilt chin lift + neutral alignment	Stj Lvl 1		
	Jaw thrust			DFA-A
	Postural airway management			
	Size and insert oropharyngeal airway			DFA-A
	Manage choking patient	Stj Lvl 1		
Breathing				
	Identify if the patient is breathing normally	Stj Lvl 1		
	Correctly assess breathing rate, depth and quality		DFA	
	Use of pulse oximetry and its limitations		DFA	
	Perform basic chest examination			DFA-A
	Identify life-threatening chest conditions			DFA-A
Management of tension pneumothorax				
	Recognition of tension pneumothorax development			DFA-A
Management of sucking chest wound				
	Recognition of a sucking chest wound			DFA-A
	Application & management of occlusive (or vented) chest dressings		(demo on DFA)	DFA-A
Management of flail chest				
	Recognition of immediately life-threatening flail chest			DFA-A
	Splintage of immediately life-threatening flail chest			DFA-A

TASKFORCE KIWI ALL VOLUNTEER FIRST AID MINIMUM COMPETENCIES		Course		
Competency	Description	StJ Lvl 1	DFA	DFA-A
	Appropriate pain management to assist ventilation			DFA-A
	Use of expired air ventilation (mouth-to-mouth/to nose)	Stj lvl1		
	Use of pocket-mask ventilation			DFA-A
	Use of supplemental oxygen			DFA-A
Circulation				
	Assess presence of circulation		DFA	
	Measure pulse rate and rhythm		DFA	
	Measure capillary refill time		DFA	
	Assessment of blood loss		DFA	
Haemorrhage control				
	As for catastrophic bleeding above and in addition:			
	Wound closure (using “Steristrips”) if appropriate		DFA	
	Splintage as a haemorrhage control method			DFA-A
	Application of pelvic splintage			DFA-A
	Application of appropriate wound dressings		DFA	
	Recognise the significance of hypothermia in trauma		DFA	
Disability				
	Be able to effectively use the AVPU assessment of conscious level		DFA	
	Identify indicators of underlying head injury		DFA	DFA-A
	Assess neurovascular status(in fractures, dislocations & wounds)		DFA	
Drowning				
	Recognition and management of unconscious drowned patient	stj lvl1		

TASKFORCE KIWI ALL VOLUNTEER FIRST AID MINIMUM COMPETENCIES		Course		
Competency	Description	StJ Lvl 1	DFA	DFA-A
	Recognition and management of conscious drowned patient			DFA-A
First Aid Provider Characteristics				
	The first aid provider should have the capacity to work autonomously and self-sufficiently under testing conditions, but also have the insight to know when to evacuate and handover care.		DFA	
	They should act selflessly and always put the patient above their own personal aspirations.	Own		
Pre-expedition planning				
	Understand the particular patterns of injury most likely to occur in a particular disaster environment		DFA	
Communications				
	Have a comprehensive working knowledge of all modes of communication available for working in remote areas including mobile and satellite phones, radios and additional e-communication systems. Appreciate the pros and cons of all methods.	general TFK training		
	Be able to quickly establish effective lines of communication between team members (both at location and remote) in an emergency situation.	general TFK training		
	Be practised in relaying information to outside agencies in a recognised and systematic manner	general TFK training		
	Have the skills to provide an effective handover of clinical care when transferring patients		DFA	

TASKFORCE KIWI ALL VOLUNTEER FIRST AID MINIMUM COMPETENCIES		Course		
Competency	Description	StJ Lvl 1	DFA	DFA-A
	Have the ability to construct a telemedicine consultation.		DFA	DFA-A
Environmental health				
	Understand the importance and provision of basic hygiene, and be able to offer pre-event planning advice, implement basic practical preventative measures, and counsel fellow team members on the same		DFA (if part of elective)	DFA-A
	Be able to oversee systems of food storage, handling and preparation methods that ensure high standards of hygiene	general TFK training		
	Have a good understanding of the range of available water purification systems and manage the provision of safe drinking water	general TFK training		
	Appreciate basic concepts of field sanitation and be able to supervise sensible latrine location and construction	general TFK training		
	Be able to offer guidance on disposal of 'grey water' and all waste.	general TFK training		
Thermal injury				
	Have a comprehensive knowledge of heat illness including risk, prevention, recognition and management.		DFA(if part of elective)	DFA-A
	Have a comprehensive knowledge of cold illness (NFCI, frostbite, hypothermia) and be able to manage appropriately in terms of risk prevention, diagnosis and treatment.		DFA(if part of elective)	DFK-A with Telehealth support
Tropical				
	Have the ability to differentiate a fever in the tropics		DFA(if part of elective)	DFA-A

TASKFORCE KIWI ALL VOLUNTEER FIRST AID MINIMUM COMPETENCIES		Course		
Competency	Description	StJ Lvl 1	DFA	DFA-A
	Be able to remove tick		DFA(if part of elective)	DFA-A
	Initiate collective and individual mosquito control measures		DFA (If part of elective)	DFA-A
	Recognition of rashes - dengue / cutaneous larva migraines / ECM		DFA (if part of elective)	DFA-A with telehealth support
	Appropriate management of land and marine envenomation		DFA (if part of elective)	DFA-A
	Application of pressure immobilisation following snake bite		DFA (if part of elective)	DFA-A with telehealth support
Extended Care				
	Have a good understanding of positioning of patients during care, paying attention to airway and potential for pressure areas.		PFC session DFA	
	Understand the importance of trends in observations and be able to instigate appropriate monitoring with respect to temperature, pulse, blood pressure, respiration, urinary output etc.		PFC session DFA with telehealth support	
	Be able to adequately prepare a patient for evacuation, including packaging and administration, and assist in the same.			DFA-A
	Nursing and patient hygiene		PFC session DFA	

TASKFORCE KIWI ALL VOLUNTEER FIRST AID MINIMUM COMPETENCIES		Course		
Competency	Description	StJ Lvl 1	DFA	DFA-A
	Understanding how to deliver appropriate analgesia with available medications and when to get further advice regarding antibiotic therapy and sedation/analgesia management		DFA with Telehealth support	DFA-A with telehealth support
Evacuation				
	Be conversant with improvised methods of extrication			DFA-A
	Have knowledge of international retrieval systems and the methods by which patients can be repatriated from remote world-wide locations		Telehealth	
	Possess a theoretical knowledge of the common rescue systems in use by aeromedical operations world-wide (e.g. long-line, winch and their limitations)		Telehealth	
Death				
	Understand how accepted resuscitation algorithms must be adapted for the disaster environment (e.g. in hypothermic cardiac arrest) and understand the circumstances where conventional CPR is futile and ought not to be attempted		DFA with telehealth support	DFA-A with telehealth support
	Be conversant with current guidelines on confirmation of death.		DFA with telehealth support	DFA-A with telehealth support
